INDEX

ACHROMATOSIS in the feathers of chicks fed lysine-deficient diets, 317.
ALEXANDER, H. D., AND H. E. SAUBERLICH. The influence of lipotropic factors on the prevention of nutritional edema in the rat, 329.
Amino acid(s) mixtures, comparison with egg protein as sources of dietary nitrogen, 555.
—— supplementing the protein in flour with. Improving the nutritive value of flour, VII., 137.
—— in whole wheat, effect of nitrogen fertilization on, 167.
2-Amino-2-methyl-1-propanol, effect of on the incidence of kidney lesions in male rats of different ages fed diets low in choline, 381.
Antibiotics and tryptophan deficiency, influence of on growth in the rat, 457.
Arachidoside, goitrogenic action of. Studies on goitrogenic agents in foods. II., 97.
Ascorbic acid deficiency in guinea pigs, influence of on the synthesis of purines, serine and methionine, 389.

BARBORIAK, J. J., AND W. A. KEEHL. Pantothenic acid deficiency and hypophysectomy, 23.
BARBORIAK, J. J., W. A. KEEHL AND G. R. COWGILL. Pantothenic acid requirement of the growing and adult rat, 13.
BASAK, R. See Banerjee, S., 395.
BANERJEE, S., AND R. BASAK. Studies on the biosynthesis of nicotinic acid from tryptophan in the rhesus monkey, 395.
Barley grain, effects of storage upon the nutritive value of as a source of protein, 343.
BATT, W. C. See Ross, M. H., 39.
BERG, R. T. See Sibbald, I. R., 71.
BLAU, M., H. SPENCER, J. SWERNOV, J. GREENBERG AND D. LASZLO. Effect of intake level on the utilization and intestinal excretion of calcium in man, 507.
BODA, J. M. See Luick, J. R., 597.
BOLDT, L. C. See Waisman, H. A., 457.
Bone density in humans and in rats, influence of mineral intake on, 489.
BOSHART, G. J. See Scoular, F. I., 297.
BOWLAND, J. F. See Sibbald, I. R., 71.
BRANION, H. D. See Klain, G. J., 317.
Butter or vegetable fat included in a basal ration free of aminal products, comparative reproduction and lactation of rats fed, 185.

CALCIUM, absorption of from milk and nonmilk diets, 571.
— intestinal excretion of in man, 507.
— metabolism, partition of in dairy cows, 597.
— and phosphorus (Nitrogen) balances of women, effect of withdrawal of estrogens on the, 357.
Calf, growing, pantothenic acid deficiency in the, 195.
Carcass composition (food consumption, nitrogen retention and) of the weanling rat, influence of apparent digestible energy and nitrogen in the food on, 71.
Caries, dental, the effect of powdered whole milk on in the rat, 281.
Cesium-134, organic factors controlling the excretory pattern of, in rats, 535.
Chicks fed lysine-deficient diets, achromatosis in the feathers of, 317.
Chicken(s), egg production in, utilization of raw soybean meal protein for, 611.
— growing, reliability of the chromic oxide indicator method for the determination of digestibility with, 31.
— laying, plasma lipid and organ changes associated with the feeding of animal fat to, 267.
Cholesterol metabolism, dietary fat and, I. Comparative effects of coconut and cottonseed oils at three levels of intake, 523.
—— (liver) storage in the rat, age differences in the effects of L-cystine and DL-methionine on, 103.
Choline, diets low in, effect of 2-amino-2-methyl-1-propanol on the incidence of kidney lesions in male rats fed, 381.
Chromic oxide indicator method for the determination of digestibility with growing chickens, reliability of, 31.
Coconut and cottonseed oils, comparative effects of at three levels of intake. Dietary fat and cholesterol metabolism, I., 523.
COFER, E. S., T. PORTER AND M. E. DAVIS. The effect of withdrawal of estrogens on the nitrogen, calcium and phosphorus balances of women, 357.
COMAR, C. L. See Lengemann, F. W., 571.
Corn meal, the addition of small amounts of defatted fish flour to. Influence on growth and protein efficiency, 547.
COSGROVE, K. W., JR. See Dinning, J. S., 389.
Cottonseed (coconut and) oils, comparative effects of at three levels of intake. Dietary fat and cholesterol metabolism. I., 523.
Cows, dairy, partition of calcium metabolism in, 597.
COWGILL, G. R. See Barboriak, J. J., 13.
CROW, L. S. See Scoular, F. I., 297.
CRUDUP, M. See Sure, B., 547.
L-Cystine and DL-methionine, age differences in the effects of on liver cholesterol in the rat, 103.

DAVIS, A. N. See Scoular, F. I., 297.
DAVIS, A. N., AND F. I. SCOULAR, WITH THE TECHNICAL ASSISTANCE OF P. WILKERSON AND K. ROEHNE. The energy value of self-selected diets consumed by young college women, 289.
DAVIS, M. E. See Cofer, E. S., 357.
DAY, P. L. Henry Clapp Sherman (October 16, 1875 – October 7, 1955), 3.

Dental caries (See Caries, dental), 281.
Diet-age patterns for hepatic enzyme activity, 39.
Diet(s) containing high levels of partial ester emulsifiers, nutritional studies on rats. III. Clinical and metabolic observations, 149; IV. Mortality and post-mortem pathology, 235.
— Lathyrus odoratus, gravimetric detection of resorption of embryos in rats on, 177.
— low in choline, effect of 2-amino-2-methyl-1-propanol on the incidence of kidney lesions in male rats of different ages fed, 381.
— lysine-deficient, achromatosis in the feathers of chicks fed, 317.
— milk and nonmilk, absorption of calcium and strontium from, 571.
— self-selected, consumed by young college women, the energy value of, 289.
— — — the protein metabolism of young college women consuming, 297.
— studies on production. The nutrition of salmonoid fishes, II., 479.
Dietary fat and cholesterol metabolism. I. Comparative effects of coconut and cottonseed oils at three levels of intake, 523.
Digestion and absorption of fat in dog and man, 405.
Digestive tract, transfer of phosphate in. IV. Turkeys, 373.
DINNING, J. S., K. W. COSGROVE, JR. AND P. L. DAY. The influence of ascorbic acid deficiency in guinea pigs on the synthesis of purines, serine and methionine, 389.
Dog, the digestion and absorption of fat in, 405.
DOWELL, J. See Sure, B., 547.
DRYDEN, L. F., J. B. FOLEY, P. F. GLEIS, L. A. MOORE AND A. M. HARTMAN. Comparative reproduction and lactation of rats fed butter or vegetable fat included in a basal ration free of animal products, 185.

EASTERLING, L. See Sure, B., 547.
Edema, nutritional, in the rat, influence of lipotropic factors on the prevention of, 329.
Egg production in the chicken, utilization of raw soybean meal protein for, 611.
— protein, comparison with amino acid mixtures as sources of dietary nitrogen, 555.
Embryos in rats on Lathyrus odoratus diet, gravimetric detection of resorption of, 177.
EMMEL, V. M. Studies on the kidney in vitamin E deficiency. I. Post-mortem autolysis in kidneys of rats fed a vitamin E-deficient diet rich in long-chain unsaturated fatty acids, 51.
EMPEY, E. L. See Young, C. M., 437.
Emulsifiers, partial ester, nutritional studies on rats on diets containing high levels of. III. Clinical and metabolic observations, 149; IV. Mortality and post-mortem pathology; general conclusions, 235.
Energy restriction, comparison of the metabolic energy contributions of feeds by growth under conditions of, 253.
— value of self-selected diet consumed by young college women, 289.
Enzyme activity, hepatic, diet-age patterns for, 39.
Estrogens, effect of withdrawal of on the nitrogen, calcium and phosphorus balances of women, 357.
Excretory pattern of potassium-42 and cesium-134 in rats, organic factors controlling, 535.

FAT, animal, fed to laying chickens, plasma lipid and organ changes associated with, 267.
— butter or vegetable, included in a basal ration free of animal products, comparative reproduction and lactation of rats fed, 185.
— dietary, and cholesterol metabolism. I. Comparative effects of coconut and cottonseed oils at three levels of intake, 523.
— digestion and absorption of in dog and man, 405.
Feathers of chicks fed lysine-deficient diets, achromatosis in, 317.
FERDO, S. See Fisher, H., 267.
Fish flour, defatted, addition of small amounts of to milled wheat flour, corn meal and rice. Influence on growth and protein efficiency, 547.
— wild and domestic, chemical and histological studies of. The nutrition of salmonoid fishes. I., 465.
FISHER, H. See Weiss, H. S., 267.
FISHER, H., D. JOHNSON, JR. AND S. FERDO. The utilization of raw soybean meal protein for egg production in the chicken, 611.
Fishes, salmonoid, nutrition of. I. Chemical and histological studies of wild and domestic fish, 465; II. Studies on production diets, 479.
Flour, improving the nutritive value of. VII. Supplementing the protein in flour with amino acids, 137.
— milled wheat, the addition of small amounts of defatted fish flour to. Influence on growth and protein efficiency, 547.
Fluoride balance studies at high levels of intake in rabbits. Investigations on the metabolism of fluoride. IV., 207.
— investigations on the metabolism of. IV. Fluoride balance studies at high levels of intake in rabbits, 207.
FOLEY, J. B. See Dryden, L. F., 185.
Food(s), comparison of the metabolic energy contributions of under conditions of energy restriction, 253.
— consumption, nitrogen retention and carcass composition of the weanling rat, influence of apparent digestible energy and nitrogen in the food on, 71.
— studies on goitrogenic agents in. I. Goitrogenic action of groundnut, 87; II. Goitrogenic action of arachidoside, 97.
— of the weanling rat, apparent digestible energy and nitrogen in. Influence on food consumption, nitrogen retention and carcass composition, 71.

GARDNER, D. E., T. G. SCHARF, F. A. SMITH AND H. C. HODGE. Investigations on the metabolism of fluoride. IV. Fluoride balance studies at high levels of intake in rabbits, 207.
GLEIS, P. F. See Dryden, L. P., 185.
Goitrogenic agents in food, studies on. I. Goitrogenic action of groundnut, 87; II. Goitrogenic action of arachidoside, 97.
GRAY, J. A. See Klain, G. J., 317.
GREENBERG, J. See Blau, M., 507.
GRIFFITH, I. V. See Scott, E. M., 421.
Groundnut, goitrogenic action of. Studies on goitrogenic agents in food. I., 87.
Growth and protein efficiency, influence of the addition of small amounts of defatted fish flour to milled wheat flour, corn meal and rice on, 547.
— in the rat, influence of antibiotics and tryptophan deficiency on, 457.

— response and liver fat deposition in rats fed bread mixtures with varying levels of non-fat milk solids and lysine, 307.
Guinea pigs, ascorbic acid deficiency in, influence on the synthesis of purines, serine and methionine, 389.
GUNTHARDT, H., AND J. MCGINNIS. Effect of nitrogen fertilization on amino acids in whole wheat, 167.

HALVER, J. E. See Wood, E. M., 465; 479.
